

Hassan Nazir

Full-Stack Engineer & AI Systems Architect | API Design · Microservices · Cloud/DevOps
+92 331 5892488 | hassannazir955@gmail.com | www.hassannazir.dev | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-stack engineer and AI systems architect with 3+ years building scalable, high-availability distributed systems and REST/event-driven APIs. Proven record designing microservice architectures processing 10K+ daily transactions at 99.9% uptime, integrating third-party services and message-driven workflows, and leading cross-functional engineering teams. Experienced with SQL/NoSQL databases, Docker/Kubernetes, CI/CD pipelines, and cloud platforms. Strong orientation toward security, observability, and regulatory-grade data handling with direct exposure to payment systems and compliance-sensitive environments. Actively expanding Java/Spring Boot expertise to complement a deep Python and API engineering background.

WORK EXPERIENCE

SR. AI ENGINEER

Aug 2025 – Present

NDT Legacy Group - Hybrid | Full-time

- Designed and deployed a microservice-based AI automation platform processing 10K+ daily transactions with 99.9% uptime across a distributed cloud infrastructure.
- Built and maintained RESTful APIs and event-driven workflows integrating internal services, third-party APIs, and message brokers (Redis queues, webhooks).
- Implemented system governance, audit logging, monitoring, and alerting frameworks, ensuring platform reliability and traceability.
- Led cross-functional engineering, DevOps, and QA teams through full SDLC from architecture design to production deployment.
- Reduced operational costs by 40% and improved workflow efficiency by 60% through intelligent backend automation and service optimization.

FULL-STACK ENGINEER

Dec 2023 – Present

Gridcore - Hybrid | Part-time

- Defined company-wide technology strategy, including backend architecture standards and API design guidelines.
- Architected scalable cloud infrastructure and ML model deployment pipelines, achieving 99.9% system reliability.
- Led engineering and DevOps functions, container orchestration, CI/CD automation, and incident response.
- Directed client-facing solution architecture, aligning backend services with business and compliance requirements.

SENIOR AI ENGINEER (API & AUTOMATION SYSTEMS)

Oct 2025 – Jan 2026

Schmoozzer - Remote | Contract

- Designed and deployed backend automation workflows, including document-processing pipelines and conversational API services for enterprise clients.
- Engineered LLM-powered REST API integrations with n8n orchestration and external service APIs.
- Delivered scalable, idempotent backend services handling high-frequency asynchronous workloads.

QA AUTOMATION ENGINEER

Feb 2025 – Sep 2025

Brilliant Gaming - Remote | Contract

- Led an 8-person QA team validating \$2M+ in monthly payment transactions, with direct exposure to payment system flows and financial data integrity.
- Built automated testing frameworks (unit, integration, regression) that cut testing time by 50%.
- Engineered AI-powered test generation identifying 200+ security edge cases across API endpoints.

INDEPENDENT CONSULTANT - BACKEND & AI SYSTEMS

2019 – Present

Fiverr / Upwork | Part-time

- Built 100+ backend automation solutions integrating REST APIs, vector databases, and asynchronous task queues.
- Developed and deployed scalable API services serving 10K+ users with high reliability.
- Delivered 20+ LLM fine-tuning and model deployment projects on cloud infrastructure.

TECHNICAL SKILLS

Backend & APIs	Python, REST API Design & Versioning, Microservices Architecture, Event-Driven Systems, FastAPI, Node.js; actively upskilling in Java/Spring Boot
Databases	PostgreSQL, MongoDB, Redis, MySQL - query optimisation, schema design, migrations; Vector DBs (Pinecone, Chroma)

Message Brokers	Redis Queues, Webhook Orchestration, n8n Workflows; familiar with Kafka/RabbitMQ patterns and async processing
Cloud & DevOps	AWS, GCP, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD Pipelines, Linux Administration
Security & Compliance	OAuth2 / JWT Authentication, API Security, Audit Logging, Encrypted Data Handling, CEH-P Certified
AI/ML & Automation	LangChain, OpenAI API, Claude API, Hugging Face, PyTorch, TensorFlow, RAG Systems, LLM Fine-tuning
Testing & Observability	Unit/Integration/Automated Testing, Selenium, Playwright, Monitoring & Alerting Frameworks
Languages	Python (primary), SQL, JavaScript, C/C++; Java (actively building proficiency)

EDUCATION

Associate Degree in Computer Science
Air University, Islamabad | 2020–2025
Focus: AI, Machine Learning, Data Science, Cloud Computing, Database Systems

CERTIFICATIONS

Certified Ethical Hacker – Practical (CEH-P) | NUST-NCAI / NAVTTC | 2024
Practical Ethical Hacking (PEH) | TCM Security Academy | 2023
ISO/IEC 27001 Information Security Associate | SkillFront | 2023
