SUMMARY

AI & Automation Engineer with 3+ years of experience in LLM fine-tuning, custom model training, and intelligent workflow orchestration. Proven expertise in LangChain, Hugging Face, n8n, and Make with measurable results: 40% cost reduction, 60% efficiency improvement, and 99.9% system uptime. Successfully led teams and delivered production-ready AI automation systems across cloud infrastructure.

WORK EXPERIENCE

Schmoozzer - Remote

Senior AI Engineer

OCT, 2025 - PRESENT
Full-time

- Designed end-to-end AI automation workflows for client operations.
- QA Testing the workflows and automations built by the teammates and deploying them into production.
- Built custom LLM-powered applications for task automation and data processing.
- Engineered workflow integrations using n8n and advanced AI model APIs.
- Implemented quality control processes to ensure accuracy and reliability across AI systems.

NDT LEGACY GROUP - Hybrid

AI AUTOMATION ENGINEER

AUG, 2025 - PRESENT
Full-time

- Built 15+ custom AI agents using LangChain and fine-tuned LLMs for business automation.
- Created n8n workflows with the latest Language model APIs, processing 10K+ daily transactions.
- Implemented RAG systems with vector databases for document processing.
- Developed multi-modal AI solutions serving 5,000+ users.

Brilliant Gaming - remote

QA Automation Engineer

Feb, 2025 - Sept 2025
Contract

- Led an 8-person QA team managing \$2M+ monthly payment transactions.
- Built automated testing frameworks, reducing testing time by half.
- Created an AI-powered test generation identifying 200+ security scenarios.
- Implemented automated reporting systems.

Gridcore - Hybrid

DevOps Engineer

Dec, 2023 - Sep 2024
Part-time

- Architected 20+ containerized AI model pipelines with Docker/Kubernetes.
- Built ML serving infrastructure supporting 1M+ daily API requests.
- Created CI/CD pipelines, achieving 99.9% uptime for ML deployments.
- Optimized cloud costs across 3 AWS regions.

QA Executive - On-Site

Touchstone Communications

Dec, 2022 - Nov, 2023
Part-time

- Led company-wide compliance checks and manual/automated testing.
- Performed risk-based audits to identify process gaps.
- Executed test cases to validate system reliability.
- Delivered concise reports and recommendations to reduce risk.

FREELANCE

FIVERR/UPWORK

2019 - PRESENT
Part-time

- Delivered 50+ custom LLM fine-tuning projects using Hugging Face
- Built 100+ AI automation solutions with LangChain and vector databases
- Created no-code AI workflows serving 10K+ users
- Executed 30+ computer vision projects

TECHNICAL SKILLS & INTERESTS

- Languages:** Python, SQL, C/C++, JavaScript
- AI/ML:** LangChain, Hugging Face, PyTorch, TensorFlow, OpenAI API, Claude API
- Automation:** n8n, Zapier, Make, Selenium, REST APIs, Playwright
- Cloud/DevOps:** AWS, GCP, Docker, Kubernetes, Jenkins, CI/CD
- Databases:** PostgreSQL, MongoDB, Redis, Vector DBs (Pinecone, Chroma)
- Specialties:** LLM Fine-tuning, RAG Systems, AI Agents, MLOps, QA Testing

EDUCATION

Associate Degree in Computer Science

Air University, Islamabad | 2020-2025

Focus: AI, Machine Learning, Cloud Computing, Database Systems

CERTIFICATIONS

Certifications

- Certified Ethical Hacker - Practical (CEH-P)** | NUST-NCAI / NAVTTC | 2024
- Practical Ethical Hacking (PEH)** | TCM Security Academy | 2023
- ISO/IEC 27001 Information Security Associate** | SkillFront | 2023
